Part II

ITEM 7A QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

In the normal course of business, we are subject to market risks. Market risk represents the risk of loss that may impact our financial position due to adverse changes in financial market prices and sales. Our exposure to market risk includes fluctuating interest rates and changes in foreign exchange rates.

Interest Rate Risk

We are exposed to the risk that our earnings and cash flows could be adversely impacted by fluctuations in interest rates associated with borrowings under our Amended and Restated Credit Agreement, or the Credit Facility, which has variable interest rates tied to LIBOR. As of December 31, 2020, we had no outstanding variable rate borrowings under our Credit Facility. Therefore, a ten percent increase in the average interest rate affecting our variable rate debt outstanding as of December 31, 2020 would not have had a material impact on our interest expense, financial position or continuing operations.

Foreign Currency Exchange Risk

We primarily use the U.S. dollar as our functional currency in all markets in which we operate in order to reduce our foreign currency market risk. Only general office expense and payroll transactions are denominated in local currency. A hypothetical ten percent devaluation of the U.S. dollar against foreign currencies would not have had a material impact on our financial position or continuing operations as of and for the year ended December 31, 2020.
